

About Us

March Consulting Associates Inc. (March) is a consulting engineering firm incorporated in 1999, following the announcement by SNC-Lavalin to close its Saskatoon operations and leave the province of Saskatchewan.

SNC-Lavalin had acquired Kilborn Engineering Ltd. in 1997. Kilborn had been active in the province of Saskatchewan since the late 1940's and with a Saskatchewan office since 1976.

We are pleased that a large number of former Kilborn employees with long standing service records in Saskatchewan formed the original core of March. We are equally pleased that this original core has grown beyond the Kilborn group of employees to include highly skilled individuals with specialized knowledge and backgrounds.
