

Structural/Architectural

March's structural and architectural department has extensive experience in the mining, petrochemical, and heavy industrial environment. March has worked on major facilities throughout the world, particularly in colder climates. Our group has extensive knowledge of engineering under extreme conditions.

Our experience covers all facets of structural engineering, including detailed structural analysis of steel and reinforced concrete structures, project coordination, management, and site supervision.

March is a leader in technology, and the structural group prides itself on being able to provide full 3D capabilities for structural design and analysis.
